

LOOP ANTENNA by I3 VHF

Automatic Tuner Unit 2.0

TUNING THE FUTURE

A year ago, we have been at the HAM RADIO to illustrate the **LOOP ANTENNA** to those who wanted to know something more about and to receive impressions from those who were already using it.

The feedback we received in those days went beyond all expectations and we went back home to upgrade our "creature" according to advices we got!!

And so, here we are!!

After a year of really hard work, we are proud to present, at the **HAM RADIO 2015**

the new **AUTOMATIC TUNER UNIT 2.0** for the **LOOP ANTENNA !!**

NEW FEATURES OVERVIEW

- new 32-bit CPU
- new 16x2 high contrast lcd display
- usb keyboard support enabled
- I/O RS232 interface (*option*)
- fully metallic chassis
- firmware updates via USB port
